Subject Index

Volume 22, July–December 1993

A

Abstracts
Abstracts of the Council for High Blood Pressure Research 47th Annual Fall Conference and Scientific Sessions, 405

Acetylcholine
Endothelial Dysfunction Augments Myogenic Arteriolar Constriction in Hypertension, 913
Enhanced γ-Aminobutyric Acid–Mediated Responses in Nucleus Tractus Solitarius of Hypertensive Rats, 819
In Vitro Perfusion Studies of Resistance Artery Function in Genetic Hypertension, 486
Sulfhydryl Group Donors Potentiate the Hypotensive Effect of Acetylcholine in Rats, 156

Acid-base equilibrium
Renal Acid-Base Excretion in Normotensive Salt-Sensitive Humans, 884

Actins
Arterial Smooth Muscle Cell Phenotype in Stroke-Prone Spontaneously Hypertensive Rats, 665

Adenosine
Angiotensin Subtype 1 Blockade Selectively Potentiates Adenosine Subtype 2–Mediated Vasodilation, 221
Caffeine Attenuates the Renal Vascular Response to Angiotensin II Infusion, 847
Natriuretic and Hypotensive Effect of Adenosine-1 Blockade in Essential Hypertension, 728

Adenosine cyclic monophosphate
Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: I. Renal α_1-, α_2-, and β-Adrenergic Receptors and Their Signaling, 169

Adenylyl cyclase
Cardiac Adenylyl Cyclase, β-Adrenergic Receptors, and G Proteins in Salt-Sensitive Hypertension, 715

Adrenal catecholamines (See Catecholamines)

Adrenal glands
Rapid Modulation of Renal and Adrenal Responsiveness to Angiotensin II, 832

Adrenergic β-receptor blockaders
Carvedilol, a New Antihypertensive Agent, Prevents Lipid Peroxidation and Oxidative Injury to Endothelial Cells, 922

Age factors
Age-Specific Genetic Effects for Blood Pressure, 789
Ambulatory Blood Pressure of Adults in Ohasama, Japan, 900

Aged
Blood Pressure Change and Survival After Age 75, 551
Is White Coat Hypertension Innocent? Structure and Function of the Heart in the Elderly, 826

Aging
Purinergic Endothelium-Dependent and -Independent Contractions in Rat Aorta, 577

Alcohol drinking
Alcohol Use and Blood Pressure in an Unacculturated Society, 365

Aldosterone
Divergent Hemodynamic and Hormonal Responses to Varying Salt Intake in Normotensive Subjects, 331
Rapid Modulation of Renal and Adrenal Responsiveness to Angiotensin II, 832

Ambulatory blood pressure (See Blood pressure monitoring, ambulatory)

Ammonium chloride
Renal Acid-Base Excretion in Normotensive Salt-Sensitive Humans, 884

Angiogenesis (See Neovascularization)

Angiotensin converting enzyme inhibitors
Antihypertensive Therapy and Adaptive Mechanisms in Peripheral Ischemia, 780
Arterial Hemodynamics in Human Hypertension: Effects of Angiotensin Converting Enzyme Inhibition, 839
Continuous Versus Intermittent Angiotensin Converting Enzyme Inhibition in Renal Hypertensive Rats, 188
Effect of Captopril on Vasoconstriction and Ca^{2+} Fluxes in Aortic Smooth Muscle, 806
Long-term Low-Dose Angiotensin Converting Enzyme Inhibitor Treatment Increases Vascular Cyclic Guanosine 3′,5′-Monophosphate, 682
Prevention of Genetic Hypertension by Early Treatment of Spontaneously Hypertensive Rats With the Angiotensin Converting Enzyme Inhibitor Captopril, 139

Angiotensin I
Nephrectomy, Converting Enzyme Inhibition, and Angiotensin Peptides, 513

Angiotensin II
Angiotensin II Increases Norepinephrine Release From Atria by Acting on Angiotensin Subtype 1 Receptors, 699
Angiotensin II/Prostaglandin I_2 Interactions in Spontaneously Hypertensive Rats, 688
Angiotensin Subtype 1 Blockade Selectively Potentiates Adenosine Subtype 2–Mediated Vasodilation, 221
Caffeine Attenuates the Renal Vascular Response to Angiotensin II Infusion, 847
Comparative Effects of Three Different Potent Renin Inhibitors in Primates, 9
Continuous Versus Intermittent Angiotensin Converting Enzyme Inhibition in Renal Hypertensive Rats, 188
Effects of Angiotensin II and Endothelin-1 on Platelet Aggregation and Cytosolic pH and Free Ca^{2+} Concentrations in Essential Hypertension, 853
Effects of Long-term Air Jet Noise and Dietary Sodium Chloride in Borderline Hypertensive Rats, 527
Insulin Increases Vascular Smooth Muscle Recovery From Intracellular Calcium Loads, 74
Insulin Reduces Contraction and Intracellular Calcium Concentration in Vascular Smooth Muscle, 735
Intra-arterial Infusion of Insulin Attenuates Vasoreactivity in Human Forearm, 67
Nephrectomy, Converting Enzyme Inhibition, and Angiotensin Peptides, 513
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496
Rapid Modulation of Renal and Adrenal Responsiveness to Angiotensin II, 832
Renal Nitric Oxide and Angiotensin II Interaction in Renovascular Hypertension, 237
Salt-Dependent Renal Effects of an Angiotensin II Antagonist in Healthy Subjects, 339

Angiotensinogen
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496

Angiotension converting enzyme inhibitors
Effects of Cilazapril on Cerebral Vasodilatation in Hypertensive Rats, 150

Animals, domestic
Transgenesis in Nonmurine Species, 630

Animals, transgenic
Circadian Blood Pressure Variation in Transgenic Hypertensive Rats, 97
Transgenesis in Nonmurine Species, 630

Anion exchange resins
Erythrocyte Anion Exchanger Activity and Intracellular pH in Essential Hypertension, 348
Antihypertensive agents
1993 Guidelines for the Management of Mild Hypertension: Memorandum From a World Health Organization/International Society of Hypertension Meeting, 392
Antihypertensive Therapy and Adaptive Mechanisms in Peripheral Ischemia, 780
Arterial Smooth Muscle Cell Phenotype in Stroke-Prone Spontaneously Hypertensive Rats, 665
Blood Pressure Change and Survival After Age 75, 551
Carvedilol, a New Antihypertensive Agent, Prevents Lipid Peroxidation and Oxidative Injury to Endothelial Cells, 922
Chlorothiazide: How the Thiazides Evolved as Antihypertensive Therapy, 388
Aorta
Potentiation of Norepinephrine-Induced Contractions by Endothelin-1 in the Rabbit Aorta, 78
Purinergic Endothelium-Dependent and -Independent Contractions in Rat Aorta, 577
Aprotinin
High Sensitivity to Salt in Kininogen-Deficient Brown Norway Katholiek Rats, 705
Arachidonic acid
Endothelial Dysfunction Augments Myogenic Arteriolar Constriction in Hypertension, 913
Arginine
Cardiovascular Responses to Long-term Blockade of Nitric Oxide Synthesis, 40
Renal Responses to Intra-arterial Administration of Nitric Oxide Donor in Dogs, 535
Role of Nitric Oxide Synthesis in Salt-Sensitive Hypertension in Dahl/Rapp Rats, 812
Argipressin
Enhancement of Intracellular Sodium by Vasopressin in Spontaneously Hypertensive Rats, 300
Transgenic Mouse Models of Vasopressin Expression, 640
Arteries (See also individual arteries)
Histology of Subcutaneous Small Arteries From Patients With Essential Hypertension, 523
Atherosclerosis
Hypercholesterolemia Promotes Endothelial Dysfunction in Vitamin E– and Selenium-Deficient Rats, 56
Atrial natriuretic peptides
Atrial Natriuretic Factor and Transgenic Mice, 634
Divergent Hemodynamic and Hormonal Responses to Varying Salt Intake in Normotensive Subjects, 331
Endopeptidase 24.11 Inhibition by SCH 42495 in Essential Hypertension, 119
Plasma Brain Natriuretic Peptide and Endopeptidase 24.11 Inhibition in Hypertension, 231
Autoregulation (See Homeostasis)

B

Blacks
Feasibility and Efficacy of Sodium Reduction in the Trials of Hypertension Prevention, Phase I, 502
Insulin-Stimulated Glucose Utilization and Borderline Hypertension in Young Adult Blacks, 18
Longitudinal Assessment of Blood Pressures in Black and White Children, 84
Normotensive Blacks Have Heightened Sympathetic Response to Cold Pressor Test, 801
Blood platelets
Effects on Blood Pressure of ω3 Fats in Subjects at Increased Risk of Cardiovascular Disease, 371
Thromboxane A_2 Receptor Antagonism and Synthase Inhibition in Essential Hypertension, 197
Blood pressure
Age-Specific Genetic Effects for Blood Pressure, 789
Alcohol Use and Blood Pressure in an Unacculturated Society, 365
Ambulatory Blood Pressure of Adults in Ohasama, Japan, 900
Blood Pressure Change and Survival After Age 75, 551
Cardiovascular Reactivity, Coronary Risk Factors, and Sympathetic Activity in Young Men, 891
Cardiovascular Reactivity to Stress Predicts Future Blood Pressure Status, 479
Circadian Blood Pressure Variation in Transgenic Hypertensive Rats, 97
Developmental Sensitivity to High Dietary Sodium Chloride in Borderline Hypertensive Rats, 542
Editorial Comment: Blood Pressure and Heredity: Is It All in the Genes, or Not? 147
Effects on Blood Pressure of ω3 Fats in Subjects at Increased Risk of Cardiovascular Disease, 371
Endopeptidase 24.11 Inhibition by SCH 42495 in Essential Hypertension, 119
Feasibility and Efficacy of Sodium Reduction in the Trials of Hypertension Prevention, Phase I, 502
Flow Regulation of Vascular Tone: Its Sensitivity to Changes in Sodium and Calcium, 273
Increased Dietary Salt Sensitizes Vasomotor Neurons of the Rostral Ventrolateral Medulla, 929
Insulin-Stimulated Glucose Utilization and Borderline Hypertension in Young Adult Blacks, 18
L-Arginine Administration Normalizes Pressure Natriuresis in Hypertensive Dahl Rats, 863
Longitudinal Assessment of Blood Pressures in Black and White Children, 84
Natriuretic and Hypotensive Effect of Adenosine-1 Blockade in Essential Hypertension, 728
Plasma Brain Natriuretic Peptide and Endopeptidase 24.11 Inhibition in Hypertension, 231
Postexercise Hypotension: Key Features, Mechanisms, and Clinical Significance, 653
Resting and Ambulatory Blood Pressure Differences in Afro-Caribbeans and Europeans, 90
Role of Pressure Natriuresis in Long-term Control of Renal Electrolyte Excretion, 102
Blood pressure determination
Bias and Variability in Blood Pressure Measurement With Ambulatory Recorders, 591
Spectral and Sequence Analysis of Finger Blood Pressure Variability: Comparison With Analysis of Intra-arterial Recordings, 26
Blood pressure monitoring, ambulatory
Ambulatory Blood Pressure of Adults in Ohasama, Japan, 900
Is White Coat Hypertension Innocent? Structure and Function of the Heart in the Elderly, 826
'White Coat' Hypertension: No Harm for the Heart, 766
Blood pressure monitors
Bias and Variability in Blood Pressure Measurement With Ambulatory Recorders, 591
Spectral and Sequence Analysis of Finger Blood Pressure Variability: Comparison With Analysis of Intra-arterial Recordings, 26
Bradykinin
Effects of Cilazapril on Cerebral Vasodilatation in Hypertensive Rats, 150
High Sensitivity to Salt in Kininogen-Deficient Brown Norway Katholiek Rats, 705
Long-term Low-Dose Angiotensin Converting Enzyme Inhibitor Treatment Increases Vascular Cyclic Guanosine 3′,5′-Monophosphate, 682
Brain stem
Increased Dietary Salt Sensitizes Vasomotor Neurons of the Rostral Ventrolateral Medulla, 929
Brief reviews
Flow Regulation of Vascular Tone: Its Sensitivity to Changes in Sodium and Calcium, 273
Postexercise Hypotension: Key Features, Mechanisms, and Clinical Significance, 653

C

Caffeine
Caffeine Attenuates the Renal Vascular Response to Angiotensin II Infusion, 847
Calcium
Effects of Angiotensin II and Endothelin-1 on Platelet Aggregation and Cytosolic pH and Free Ca^{2+} Concentrations in Essential Hypertension, 853
Flow Regulation of Vascular Tone: Its Sensitivity to Changes in Sodium and Calcium, 273
Insulin Increases Vascular Smooth Muscle Recovery From Intracellular Calcium Loads, 74
Potentiation of Norepinephrine-Induced Contractions by Endothelin-1 in the Rabbit Aorta, 78
Calcium channel blockers
Antihypertensive Therapy and Adaptive Mechanisms in Peripheral Ischemia, 780
Effects of Calcium Channel Blockade on the Aortic Intima in Spontaneously Hypertensive Rats, 569
Calcium channels
Effect of Captopril on Vasoconstriction and Ca^{2+} Fluxes in Aortic Smooth Muscle, 806
Insulin Reduces Contraction and Intracellular Calcium Concentration in Vascular Smooth Muscle, 735
Captopril
Arterial Hemodynamics in Human Hypertension: Effects of Angiotensin Converting Enzyme Inhibition, 839
Effect of Captopril on Vasoconstriction and Ca^{2+} Fluxes in Aortic Smooth Muscle, 806
Prevention of Genetic Hypertension by Early Treatment of Spontaneously Hypertensive Rats With the Angiotensin Converting Enzyme Inhibitor Captopril, 139
Cardiac output
Obesity-Induced Hypertension: Renal Function and Systemic Hemodynamics, 292
Cardiomyopathy, hypertrophic
Cardiac Adenylyl Cyclase, β-Adrenergic Receptors, and G Proteins in Salt-Sensitive Hypertension, 715
Cardiovascular diseases
Blood Pressure Change and Survival After Age 75, 551
Cardiovascular hyperreactivity
Cardiovascular Reactivity, Coronary Risk Factors, and Sympathetic Activity in Young Men, 891
Casual blood pressure (see Blood pressure)
Catecholamines
Cardiovascular Reactivity, Coronary Risk Factors, and Sympathetic Activity in Young Men, 891
Endopeptidase 24.11 Inhibition by SCH 42495 in Essential Hypertension, 119
Sex-Specific Effects of an Insulin Secretagogue in Stroke-Prone Hypertensive Rats, 214
Sympathoadrenal System Is Critical for Structural Changes in Genetic Hypertension, 243
Cell line
Double Knockouts: Production of Mutant Cell Lines in Cardiovascular Research, 646
Cell nucleus
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496

Effects of Calcium Channel Blockade on the Aortic Intima in Spontaneously Hypertensive Rats, 569

Enhanced γ-Aminobutyric Acid–Mediated Responses in Nucleus Tractus Solitarius of Hypertensive Rats, 819
In Vitro Perfusion Studies of Resistance Artery Function in Genetic Hypertension, 486
Long-term Low-Dose Angiotensin Converting Enzyme Inhibitor Treatment Increases Vascular Cyclic Guanosine 3′,5′-Monophosphate, 682
Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: I. Renal α_1-, α_2-, and β-Adrenergic Receptors and Their Signaling, 169
Prevention of Genetic Hypertension by Early Treatment of Spontaneously Hypertensive Rats With the Angiotensin Converting Enzyme Inhibitor Captopril, 139
Rested-State Contractions and Rest Potentiation in Spontaneously Hypertensive Rats, 306
Sulfhydryl Group Donors Potentiate the Hypotensive Effect of Acetylcholine in Rats, 156

Rats, inbred SHR, Stroke-prone
Effects of Cilazapril on Cerebral Vasodilatation in Hypertensive Rats, 150

Rats, inbred WKY
Sulfhydryl Group Donors Potentiate the Hypotensive Effect of Acetylcholine in Rats, 156

Receptors, adrenergic
In Vivo Hypothalamic Release and Synthesis of Catecholamines in Spontaneously Hypertensive Rats, 467
Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: I. Renal α_1-, α_2-, and β-Adrenergic Receptors and Their Signaling, 169

Receptors, adrenergic, alpha
Insulin Does Not Reduce Forearm α-Vasoreactivity in Obese Hypertensive or Lean Normotensive Men, 584
Sympathoadrenal System Is Critical for Structural Changes in Genetic Hypertension, 243

Receptors, adrenergic, beta
Cardiac Adenylyl Cyclase, β-Adrenergic Receptors, and G Proteins in Salt-Sensitive Hypertension, 715

Receptors, angiotensin
Angiotensin II Increases Norepinephrine Release From Atria by Acting on Angiotensin Subtype 1 Receptors, 699
Antihypertensive Therapy and Adaptive Mechanisms in Peripheral Ischemia, 780
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496
Salt-Dependent Renal Effects of an Angiotensin II Antagonist in Healthy Subjects, 339

Receptors, endothelin
Biological Role for the Endothelin-A Receptor in Aortic Cross-Clamping, 62

Receptors, purinergic
Purinergic Endothelium-Dependent and -Independent Contractions in Rat Aorta, 577

Receptors, thromboxane
Endothelial Dysfunction Augments Myogenic Arteriolar Constriction in Hypertension, 913
Thromboxane A_2 Receptor Antagonism and Synthase Inhibition in Essential Hypertension, 197

Recombination, genetic
Double Knockouts: Production of Mutant Cell Lines in Cardiovascular Research, 646

Reference values
Ambulatory Blood Pressure of Adults in Ohasama, Japan, 900

Regional blood flow
Flow Regulation of Vascular Tone: Its Sensitivity to Changes in Sodium and Calcium, 273

Renal circulation
Caffeine Attenuates the Renal Vascular Response to Angiotensin II Infusion, 847
De Novo Hypertension After Liver Transplantation, 257
Renal Nitric Oxide and Angiotensin II Interaction in Renovascular Hypertension, 237
Role of Pressure Natriuresis in Long-term Control of Renal Electrolyte Excretion, 102
Salt-Dependent Renal Effects of an Angiotensin II Antagonist in Healthy Subjects, 339

Renal failure, acute (See Kidney failure, acute)

Renal sodium handling
Natriuretic and Hypotensive Effect of Adenosine-1 Blockade in Essential Hypertension, 728

Renin
Cardiac Weight in Hypertension Induced by Nitric Oxide Synthase Blockade, 380
Comparative Effects of Three Different Potent Renin Inhibitors in Primates, 9
Divergent Hemodynamic and Hormonal Responses to Varying Salt Intake in Normotensive Subjects, 331
Major Approaches for Generating and Analyzing Transgenic Mice: An Overview, 599
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496
Obesity-Induced Hypertension: Renal Function and Systemic Hemodynamics, 292

Renin-angiotensin system
Endopeptidase 24.11 Inhibition by SCH 42495 in Essential Hypertension, 119
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496
Renal Nerves Affect Rate of Achieving Sodium Balance in Spontaneously Hypertensive Rats, 1

RNA, messenger
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496

Ruminants
Transgenesis in Nonmurine Species, 630

S

Selenium
Hypercholesterolemia Promotes Endothelial Dysfunction in Vitamin E– and Selenium-Deficient Rats, 56

Serotonin
Effects of Calcium Channel Blockade on the Aortic Intima in Spontaneously Hypertensive Rats, 569
Insulin Reduces Contraction and Intracellular Calcium Concentration in Vascular Smooth Muscle, 735

Sodium
Enhancement of Intracellular Sodium by Vasopressin in Spontaneously Hypertensive Rats, 300
Flow Regulation of Vascular Tone: Its Sensitivity to Changes in Sodium and Calcium, 273
Obesity-Induced Hypertension: Renal Function and Systemic Hemodynamics, 292
Renal Acid-Base Excretion in Normotensive Salt-Sensitive Humans, 884
Renal Sodium Excretion in Sons of Hypertensive Parents, 323
Role of Pressure Natriuresis in Long-term Control of Renal Electrolyte Excretion, 102
Salt-Dependent Renal Effects of an Angiotensin II Antagonist in Healthy Subjects, 339
Salt-Induced Increase in Arterial Pressure During Nitric Oxide Synthesis Inhibition, 49
Sodium-Lithium Countertransport Genotype and the Probability of Hypertension in Adults, 560

Sodium chloride
Developmental Sensitivity to High Dietary Sodium Chloride in Borderline Hypertensive Rats, 542
Renal Nerves Affect Rate of Achieving Sodium Balance in Spontaneously Hypertensive Rats, 1

Sodium-lithium exchange (See Ion exchange)

Sodium-potassium pump
Long-term Ouabain Administration Produces Hypertension in Rats, 178

Sodium-proton exchange (See Ion exchange)

Sodium, dietary
Cardiac Adenylyl Cyclase, β-Adrenergic Receptors, and G Proteins in Salt-Sensitive Hypertension, 715
Divergent Hemodynamic and Hormonal Responses to Varying Salt Intake in Normotensive Subjects, 331

Feasibility and Efficacy of Sodium Reduction in the Trials of Hypertension Prevention, Phase I, 502
High Sensitivity to Salt in Kininogen-Deficient Brown Norway Katholiek Rats, 705
Rapid Modulation of Renal and Adrenal Responsiveness to Angiotensin II, 832
Special Article
1993 Guidelines for the Management of Mild Hypertension: Memorandum From a World Health Organization/International Society of Hypertension Meeting, 392
Special Feature
Manipulating Genes to Understand Cardiovascular Diseases: Principles, Methodologies, and Applications, 599-651
Spectrum analysis
Spectral and Sequence Analysis of Finger Blood Pressure Variability: Comparison With Analysis of Intra-arterial Recordings, 26
Spectrum analysis, mass
Thromboxane A_2 Receptor Antagonism and Synthase Inhibition in Essential Hypertension, 197
Stem cells
Embryonic Stem Cell Model Systems for Vascular Morphogenesis and Cardiac Disorders, 618
Stress
Cardiovascular Reactivity, Coronary Risk Factors, and Sympathetic Activity in Young Men, 891
Cardiovascular Reactivity to Stress Predicts Future Blood Pressure Status, 479
Sulfhydryl compounds
Sulfhydryl Group Donors Potentiate the Hypotensive Effect of Acetylcholine in Rats, 156
Sulfonylurea compounds
Sex-Specific Effects of an Insulin Secretagogue in Stroke-Prone Hypertensive Rats, 214
Survival
Blood Pressure Change and Survival After Age 75, 551
Sympathectomy
Sympathoadrenal System Is Critical for Structural Changes in Genetic Hypertension, 243
Sympathetic nervous system
Developmental Sensitivity to High Dietary Sodium Chloride in Borderline Hypertensive Rats, 542
Effects of Long-term Air Jet Noise and Dietary Sodium Chloride in Borderline Hypertensive Rats, 527
Excitatory Sympathetic Reflex in NaCl-Sensitive Spontaneously Hypertensive Rats, 285
In Vivo Hypothalamic Release and Synthesis of Catecholamines in Spontaneously Hypertensive Rats, 467
Increased Dietary Salt Sensitizes Vasomotor Neurons of the Rostral Ventrolateral Medulla, 929
Normotensive Blacks Have Heightened Sympathetic Response to Cold Pressor Test, 801
Possible Genetic Influence on the Strength of Human Muscle Nerve Sympathetic Activity at Rest, 282

T

T lymphocytes, helper-inducer
Early Interstitial Changes in Hypertension-Induced Renal Injury, 754
Telemetry
Circadian Blood Pressure Variation in Transgenic Hypertensive Rats, 97
Thromboxanes
Thromboxane A_2 Receptor Antagonism and Synthase Inhibition in Essential Hypertension, 197
Tonometry
Wave Reflections and Cardiac Hypertrophy in Chronic Uremia: Influence of Body Size, 876
Transcription, genetic
Nuclear Angiotensin Receptors Induce Transcription of Renin and Angiotensinogen mRNA, 496
Transfection
Embryonic Stem Cell Model Systems for Vascular Morphogenesis and Cardiac Disorders, 618
Major Approaches for Generating and Analyzing Transgenic Mice: An Overview, 599
Transforming growth factor β
Embryonic Stem Cell Model Systems for Vascular Morphogenesis and Cardiac Disorders, 618
Tunica intima
Evidence for In Vivo Carotid and Femoral Wall Thickening in Human Hypertension, 111
Tunica media
Evidence for In Vivo Carotid and Femoral Wall Thickening in Human Hypertension, 111
Twins
Possible Genetic Influence on the Strength of Human Muscle Nerve Sympathetic Activity at Rest, 282

U

Ultrasonography
Evidence for In Vivo Carotid and Femoral Wall Thickening in Human Hypertension, 111
Uremia
Franz Volhard in Historical Perspective, 253
Wave Reflections and Cardiac Hypertrophy in Chronic Uremia: Influence of Body Size, 876
Uric acid
Salt-Dependent Renal Effects of an Angiotensin II Antagonist in Healthy Subjects, 339

V

Vascular resistance
Biological Role for the Endothelin-A Receptor in Aortic Cross-Clamping, 62
Elevated Renovascular Tone in Young Spontaneously Hypertensive Rats: Role of Cytochrome P-450, 357
Flow Regulation of Vascular Tone: Its Sensitivity to Changes in Sodium and Calcium, 273
